Education

Bachelor's of Science, Computer Science

Wright State University

Full-Stack JavaScript Developer NanoDegree

Color Coded Labs

Technical Skills:

- Cyber Security Analytics Undergraduate Certificate
- Languages: Java, C++, Python, SQL, NoSQL, HTML5/CSS, JavaScript
- Frameworks: Vue, Angular, React, React Native
- Developer Tools: Git, Github, VS Code, Netbeans, Google Cloud Platform, Expo Go

Relevant Course Work:

Software Engineering: Software qualities, development life-cycle models, requirements analysis, semi-formal/formal systems modeling, system design, testing, and project management techniques.

Data Structures & Algorithms: Study of the implementation of data structures and control structures in professional computer programs with emphasis on high-level language software design.

Relevant Projects

Food Finder 4110: Created an Android based phone app with a Java backend that allows basic functions to be performed that are necessary for the SeeFood API to make the correct decisions.

Open Bay Autos: Created a mobile application with Expo Go and GCP that would provide mobile car detailing and mechanic services for clients.

Wellness Clinic - Medical Group: Designed and created a database to be used by a hypothetical clinic that provides medical care in the rural area of the country.

Employment

Tasting Room Attendant, Coopers Hawk Winery & Restaurant

Feb 2024 – Present

- Proactively build relationships with Guests to create memorable experiences
- Maintain Guest invitation rate of 12.5%
- Handle cash and utilize the MICROS system according to company standards

Lead Software Engineer, Real Ones Create

Jan 2022 – July 2023

- Establish the technical vision and strategic direction for internal/external technological development
- Create secure and high-quality production code and maintain algorithms that run synchronously with appropriate systems; 100% on-time project completion for clients

Software Engineer I, Altamira Technologies

Dec 2020 – Oct 2021

- Utilized SCRUM's agile project management framework to help structure and manage team projects for multiple clients; each project requiring months of integration and implementation
- Produce software based on desired functionality provided by users and analysts
- Interact with teammates/users through whiteboard sessions and /or design documents to establish circular feedback; provide detailed analysis and feedback for system issues

Truth Worker, Wright State University

Oct 2017 – Mar 2020

- Image "truthing" consists of hand tracking objects of interest (vehicles and pedestrians) in wide area motion imagery, requiring detailed directions in a self-motivated, minimally supervised environment
- Determined and recorded the actual location or "truth" of moving objects from frame to frame as well as the status of environmental operating conditions
